Day 26 – Python Enumerate

Enumerate a python list and try to print the counter with the list value

In [1]:

```python
list1= ['vinita','rakhi','neha','purnima','shweta','indu']
print(list(enumerate(list1)))
```

```
[(0, 'vinita'), (1, 'rakhi'), (2, 'neha'), (3, 'purnima'), (4, 'shweta'),
(5, 'indu')]
```

In [2]:

```python
print(enumerate(list1))
```

```
<enumerate object at 0x000002BC212344A8>
```

• Enumerate a python tuple and try to print the counter with the tuple value

In [3]:

```python
tuple1= ('vinita','rakhi','neha','purnima','shweta','indu')
print(tuple(enumerate(list1)))
```

```
((0, 'vinita'), (1, 'rakhi'), (2, 'neha'), (3, 'purnima'), (4, 'shweta'),
(5, 'indu'))
```
